APP FLOW

ABOUT THIS PROJECT

"Treed-track" is a mobile application designed to revolutionize inventory management. With this app, users can effortlessly scan product barcodes upon arrival in the warehouse, instantly updating their stock database within their enterprise management software. Similarly, when products are sold, scanning the associated barcode and selecting the quantity updates the inventory in real-time. This method ensures a constant, precise overview of available products, significantly reducing errors in warehouse management.

Problem

Traditionally, inventory management can be a time-consuming and error-prone process. Manual data entry often leads to inaccuracies, and the need to physically record each item can be cumbersome.

Solution

Treed-track provides a modern, efficient solution to these challenges. By enabling users to scan product barcodes, the app automates inventory updates, saving time and reducing errors. This streamlined approach ensures that businesses maintain an accurate and up-to-date inventory effortlessly.

SCANNING PHASE

Streamline Inventory with Barcode Scanning

Reimagine inventory management with barcode scanning. Treed-track eliminates data entry errors, ensuring real-time updates. It turns tedious scanning into a seamless experience. Our double-check feature displays scanned products, guaranteeing precision
